EMPLOYMENT HISTORY

Frontend Developer

Travelers Haven | August 2017 - Present

- Lead frontend developer on a consumer facing app, similar to AirBNB, using React with Redux for state management, and consuming a Rails based API.
- Maintains and develops new features for a large codebase using React, AngularJS, Vue, and Ruby on Rails
- Responsible for migrating legacy AngularJS controllers and components to React and adding test coverage using React Testing Library
- Assesses the feasibility and technical requirements for new features from the product team in an Agile environment
- Creation and testing of CRUD endpoints in a Rails app
- Currently working fully remote

Marketing Manager/Web Developer

Primary Weapons Systems | Oct 2011 - April 2016

- Set up and managed a Wordpress/WooComerce powered storefront for both Primary Weapons and it's sister company Bootleg Inc.
- Led a team of illustrators, a videographer, and a social media expert as Marketing Director in charge of all marketing efforts including print material, YouTube videos, and product manuals/catalogues
- Directed marketing animations, including the use of Adobe After Effects, Illustrator, Photoshop, and Premiere, for company marketing projects
- Managed three servers and over forty five workstations as the company's IT Director prior to promotion to Marketing Manager

Technician

Boise Computer Store | Oct 2008 - Oct 2011

- Diagnosed and repaired desktop machines, laptops, routers, switches, cable and DSL modems, and other related hardware
- Repaired all software problems in the following operating systems: Windows 95, 98, ME, 2000, XP, Vista, and Windows 7, along with Mac OSX and various Linux distributions
